Lessons learned Conclusion and miscellaneous	0.5 0.5			
conclusion and miscellaneous Overall writing quality	1.5			
Overall writing quality Overall formatting and presentation quality	1.5			
overall formatting and presentation quality	1.5			

P.S: Your project's final grade might be different than what you see in the feedback sheet if your team requested a peer-review evaluation after completing the project. This is a standard process at UofC to assure a higher level of fairness and grading integrity

This feedback and marks document is inspired by Data 201 course.

P.S: full grade are given based on the quality of each component and not based on the exitance of the component only. In other words, submitting an assignment with all the above mentioned components doesn't' guarantee the student a full mark. To enhance your learning experience, your TA will always provide you will proper feedback when not giving full marks.
